Planning Tool – Manual for Managers

This is a very brief description of the few steps that are needed to edit the forecast online inside the Planning Tool.

- 1. Open the Hoffmann Mineral homepage, select English as language, open <u>Login</u> > <u>Agency Portal</u> > Log in with your username (your email address) and password.
- 2. Open <u>Planning Tool Overview</u>. By default, you are on page **Status**.

The status of the planning of every agency can be taken from the two columns below the header "Status." "Upload" indicates that the Upload button has been used at least once. If "Finished" is shown, this agency's records have been locked, the control buttons removed (Fig. 1 & 2). You should have received an email that informed you about this fact.

You may open an agency's records by clicking on its name. Depending on the status of editing by the agency (finished or not), you will see the link "ASM Modus aktivieren". With this mode activated, you will be able to change the data online.

3. Activate ASM ("Area Sales Manager¹") Mode by clicking on "ASM Modus aktivieren". Navigation is done in the same way as already described in the User Manual. On the <u>Input</u> page of an article either confirm the Agency's forecast figures in the rightmost column ("Correction") by pressing <u>Save</u> or do so after you made changes.

If you change data, do not forget to press Upload. Only then will the new data be available in Cognos. If you do not do anything, the data provided by the agency (or, if they did not make any changes, the default figures) will be imported into Cognos. You may later edit them there.

- 4. In <u>Planning Tool Overview</u>, open **Article** (Fig. 3). The table displays every article that is active in Hofmann Mineral's system with forecast figures. Initially, all figures are pre-set and will be changed or confirmed during the planning period. Changes made online by an ASM and their effect on the total volume are also shown.
- 5. Click on <u>Show</u> to see which companies purchased this article and where ASM changed values (Fig. 4).
- 6. When you are done, click on "ASM Modus deaktivieren"
- 7. Log out.

It does not make a difference if you look at the data provided by "your agencies" – or you do not. When the time has come to import these data into the *Cognos Basisplan*, it will be done. You still can use the Cognos Tool to knock the data into shape.

Planning Tool Overview

The <u>Status</u> table lists all distributors in alphabetical order. If a distributor does the planning for selected direct customers, they are grouped below the distributor's record, indicated by ">".

Manuals Media Pool Newsletter	Planning Tool Overview Year: 2014 Status Article

Fig. 2: Status of Actions by Agency and Area Sales Manager

A click on <u>Article</u> opens a table which contains all currently used articles at Hoffmann Mineral. The total forecasted volume [kg] is displayed below the header "Agency", a mixture of default figures and data actively entered by the agencies. If corrections have been made by Area Sales Managers, the new total is shown in the adjacent column, followed by the difference.
