

Top products for adhesives

Sillitin V 85 – Cost efficiency and sustainable

- Natural filler with positive environmental aspects
- Easy dosing and incorporation
- Very low carbon footprint
- Low viscosity

Sillitin Z 86 / Z 89 puriss – excellent dispersing behavior

- Natural filler with positive environmental aspects
- Better processability and faster production
- Excellent dispersing behavior
- Improved sedimentation and storage stability

Aktisil AM / Aktisil AM/89 – Improved mechanics and resistances

- Available in two different color options, amino-functionalized
- High reactivity and cure speed
- Increased resistance to chemicals
- Improved mechanical properties
- Very good abrasion resistance
- Less amino-silane content in the formulation needed

Aktisil PF 777 / Aktisil PF 777/89 – Rheological and hydrophobic effects

- Available in two different color options, alkyl-functionalized
- Rheological activity
- Improved adhesion
- Improved water resistance
- Increased resistance to chemicals

Gloxil bright VM – for moisture sensitive systems

- Highest color neutrality in addition vinyl-functionalized
- Hydrophobic: very low moisture content with no increase in humid climatic conditions
- Improved adhesive lap-shear strength
- Excellent water resistance
